Cleaning couldn't be simpler

- Completely removable odour trap for easy and thorough cleaning
- Easy and direct access to the drain area
- No concealed dirt-traps thanks to the flush-mounted and exposed water path

DallFlex shower channels: individuality as the standard

Stylistic and functional –
the fitting shower channel
for every need.

Our versatile shower channel systems stand for excellence across the board, and create bathrooms without limits. The basis lies in our DallFlex drain bodies, which are individually combined with the fitting shower channel. Easiest care included: the shower channel is simply wiped off and dirt is rinsed directly off of the completely removable odour trap. Front-of-wall or in-floor installation? Our system, with CeraWall, CeraFloor, and Compact, guarantees a level of variety and flexibility in every area of application that no other drainage system to date can offer. Always according to your needs.

Do you need something more exclusive?
Select comprises accentuated premium models made of solid stainless steel.

Do you value individual design freedom?
Our Individual line stands for customisable shower channels that are virtually invisible.

Do you prefer something budget-friendly and well-designed?
The Pure models are our budget-friendly design variants.

Variety makes all the difference.
Stylistic and functional.
